## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Group A, claim(s) 1-12, drawn to compositions comprising *sequence identification number 3* and its utility, classified in class 530, subclass 300 for example.

II. Group B, claim(s) 1-12, drawn to compositions comprising *sequence identification number 5* and its utility, classified in class 530, subclass 300 for example.

III. Group C, claim(s) 1-12, drawn to compositions comprising *sequence identification number 6* and its utility, classified in class 530, subclass 300 for example.

2. The inventions of Group A, B, and C above include a plurality of disclosed patentably distinct inventions (materially different substances as evidence by their separate SEQ ID Numbers). Therefore, each disclosed patentably distinct sequences/compositions and is considered a separate invention. Applicant is required to elect one Seq. Id. No. for prosecution in the instant application. 1232 OG 242 (116) 3/21/00 The O.G. Notice permits the examiner to examine up to ten nucleotide sequences per application based on use of US PTO resources.

Resources are now stretched to the limit, so only one sequence should be searched per application.

Art Unit: 1641

3. Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product and a method of using it – three different products have been claimed (seq. id. no.3, seq. id. No.5, and seq. id. No.6). Therein one sequence must be selected for consideration.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Please note that the classifications in the restriction are illustrative only and **do not** represent all the classes and subclasses which must be searched for each invention; nor is the search limited to issued US patents, but rather includes foreign patents and applications as well as literature searches.
5. Applicant is advised that the reply to this requirement be complete and must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1641

7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 1641 Fax number is (703) 308-4242 which is able to receive transmissions 24 hours/day, 7 days/week.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lisa V. Cook whose telephone number is (703) 305-0808. The examiner can normally be reached on Monday-Friday from 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le, can be reached on (703) 305-3399.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
